

§11.4.153–§11.4.158 Constitution Audit — Gap Analysis

Date: 2026-06-19 **Auditor:** Automated constitution-audit agent **Scope:** Feature video recording and Status doc mandates in Helix OTA.

Executive Summary

6 mandates audited. Significant gaps in 5/6. Status document set is well-maintained but mechanical-enforcement and propagation layers are missing. CI/CD actively violates §11.4.156.

Per-Mandate Findings

§11.4.153 — Per-feature Status + video confirmation

Check	Result
Status.md exists with Video Recorded+Analysis columns	PASS
Status_Summary.md with two-audience format	PASS
HTML+PDF exports	PASS
DOCX export	FAIL — no .docx, docs_chain only has HTML+PDF
docs_chain wired	PASS — .docs_chain/contexts/features-status.yaml exists
Drift-proof fingerprint	FAIL — no sha256 roster fingerprint
Propagation in CLAUDE.md	FAIL — no 11.4.153 anchor
Propagation in AGENTS.md	FAIL — no 11.4.153 anchor
CM-COVENANT-114-153-PROPAGATION gate	FAIL — not in pre_build_verification.sh

§11.4.154 — Window-scoped + fresh-corpus rotation

Check	Result
Window-scoped recordings	PASS
Fresh-corpus rotation enforced	FAIL

Check	Result
Propagation in CLAUDE.md	FAIL
Propagation in AGENTS.md	FAIL
Propagation gate	FAIL

§11.4.155 — Project-prefixed filenames

Check	Result
Prefix present (helix_ota-)	PASS
Triple-hyphen separator ---	FAIL — uses single hyphen
.env.example documents HELIX_RELEASE_PREFIX	FAIL — no .env.example exists
Propagation in CLAUDE.md	FAIL
Propagation in AGENTS.md	FAIL
Propagation gate	FAIL

§11.4.156 — All CI/CD disabled

Check	Result
CI workflows disabled	CRITICAL FAIL — 3 active: ci.yml, ota-manager.yml, ota-manager-tauri.yml
Disabled copies exist	FAIL — no .disabled-local-only copies
Pre-push gate	FAIL
Propagation in CLAUDE.md	FAIL
Propagation in AGENTS.md	FAIL
Propagation gate	FAIL

§11.4.157 — GEMINI.md lockstep

Check	Result
constitution/GEMINI.md exists	PASS
constitution/QWEN.md exists	PASS
Highest § in constitution mirrors matched	PASS — both at §11.4.158
Project GEMINI.md	N/A — project may not use Gemini
Propagation in CLAUDE.md	FAIL
Propagation in AGENTS.md	FAIL
Propagation gate	FAIL

§11.4.158 — Recording + read-the-screen verification

Check	Result
Content analysis done	PASS — REPORT.md present, 5 recordings analysed
Status.md cites §11.4.158	PASS
Save path = \$HOME/Downloads	FAIL — uses /Volumes/T7/Downloads/Recordings/
Recording path override declared	FAIL — no CLAUDE.md declaration
Propagation in CLAUDE.md	FAIL
Propagation in AGENTS.md	FAIL
Propagation gate	FAIL

Remediation Plan

HIGH (release blocker)

1. Disable 3 CI workflows per §11.4.156
2. Add propagation gate checks to pre_build_verification.sh
3. Add §11.4.153-158 literal anchors to AGENTS.md
4. Add §11.4.153-158 project constraints to CLAUDE.md

MEDIUM (process violation)

1. Create .env.example with HELIX_RELEASE_PREFIX documented
2. Wire DOCX export into docs_chain features-status context
3. Declare recording path override in CLAUDE.md
4. Add drift-proof fingerprint to docs_chain context

LOW (best practice)

1. Rename existing recordings to triple-hyphen convention
2. Document recording procedures

Files to be Modified

- .github/workflows/*.yml → rename to .disabled-local-only (3 files)
- tests/pre_build_verification.sh — add 6 propagation gates
- AGENTS.md — add literal anchors
- CLAUDE.md — add project constraints
- .docs_chain/contexts/features-status.yaml — add DOCX + fingerprint
- .env.example — create with HELIX_RELEASE_PREFIX

constitution/ is untouched (read-only submodule).
