

OTA Manager Desktop App Recording Report

Recording metadata

Field	Value
App	Helix OTA Manager (Tauri v2)
Type	Desktop native GUI (macOS)
Duration	30 seconds
Frames	30 at 1 fps
Codec	H.264 (libx264)
Resolution	1280x800
Format	MP4 (mov,mp4,m4a,3gp)
Capture method	Window-scoped region (screenshot -R)
Window location	(116,61) points from top-left
Window size	1280x800 points
Recording path	~/Downloads/helix_ota---ota-manager---20260620T064921Z.mp4
Evidence dir	docs/qa/20260620T064840Z-ota-manager/

Compliance checklist

Liveness (§11.4.107)

- ☒ Multiple frames captured (30 frames)
- ☒ Frames differ between first and last (not frozen/stale)
- ☒ Duration matches expected (30.0 s)
- ☒ H.264 yuv420p codec

Window-scoped (§11.4.154)

Captured window region only: (116,61,1280,800)

NOT whole-desktop capture

Window title “Helix OTA Manager” confirmed

Project prefix (§11.4.155)

Filename starts with helix_ota--- (project prefix)

Canonical form: helix_ota---ota-manager---<timestamp>.mp4

Stored in \$HOME/Downloads/

Real app (§11.4.153)

Built from source (Tauri v2, Rust + React/TypeScript)

Connecting to live Go server at localhost:8080

Server responding: {"status": "ok"}

Build summary

- Frontend: Vite + React 19 + Radix UI + TanStack Query
- Backend: Rust/Tauri v2 + Go server
- Binary: ota-manager (macOS release build)
- Build artifacts: .app bundle + .dmg

Recording content

The OTA Manager is a Tauri v2 desktop application that provides a native GUI for managing OTA updates. The recording shows the application window with its dashboard interface, including device management and update tracking capabilities.
