

Helix OTA — Deployed Websites

Helix OTA — Deployed Website Targets & Test Links

Revision: 1 Last modified: 2026-07-13T01:10:00Z

Complete inventory of all Firebase-hosted web surfaces for the `helix-ota` project. All three targets are live, verified HTTP 200, and listed below.

Firebase Project

Field	Value
Project ID	helix-ota
Console	https://console.firebase.google.com/project/helix-ota/overview
Default URL	https://helix-ota.web.app

1. Dashboard (Operator Console)

Field	Value
Test link	<u>https://helix-ota.web.app</u>
Firebase target	dashboard
Firebase site	helix-ota
Source directory	dashboard/dist
Purpose	

Field	Value
	Fleet management dashboard — releases, deployments, device groups, telemetry
SEO	noindex (admin SPA — not a public surface)

2. OTA Manager (Admin SPA)

Field	Value
Test link	https://helix-ota-manager.web.app
Firebase target	ota-manager
Firebase site	helix-ota-manager
Source directory	clients/ota-manager/dist
Purpose	OTA administration console — artifact upload, signing, release management
SEO	noindex (admin SPA)

3. Public Marketing Website

Field	Value
Test link	https://helix-ota-website.web.app
Firebase target	website
Firebase site	helix-ota-website
Source directory	submodules/website/dist/ helix_ota_website/browser
Source repo	github.com/HelixDevelopment/ helix_ota_website
Framework	Angular 22 SSR/SSG
Design	9-section single-page home — OpenDesign Helix-green brand

Field	Value
SEO	crawable/indexable (\$11.4.190)

Quick Reference — All Links

#	Site	URL
1	Dashboard	https://helix-ota.web.app
2	OTA Manager	https://helix-ota-manager.web.app
3	Marketing Website	https://helix-ota-website.web.app

Configuration

Three named Firebase hosting targets defined in `firebase.json`:

```
"dashboard" → public: "dashboard/dist"
"ota-manager" → public: "clients/ota-manager/dist"
"website" → public: "submodules/website/dist/
               helix_ota_website/browser"
```

Site ID to target mapping in `.firebaserc`:

```
"dashboard" → site: "helix-ota"
"ota-manager" → site: "helix-ota-manager"
"website" → site: "helix-ota-website"
```

Deploy Commands

```
firebase deploy --only hosting:dashboard
firebase deploy --only hosting:ota-manager
firebase deploy --only hosting:website
```

No custom domain is configured. All sites serve on `*.web.app` subdomains. The design spec (`WEBSITE_DESIGN_PROPOSAL.md`) references a future production domain — this document will be updated when that domain is provisioned.
