

§11.4.65 Export-sibling coverage sweep — docs/research/main_specs/

Run ID: 20260608-md-coverage-sweep **Date (UTC):** 2026-06-08T15:34Z **Scope:** tracked non-source Markdown under docs/research/main_specs/, EXCLUDING the additions/ source corpus and any _exports/ dirs.
Mechanism: pandoc <f>.md -s -o <f>.html then weasyprint <f>.html <f>.pdf, each output file-verified.

Tools (confirmed present)

- pandoc 3.9.0.2 (/opt/homebrew/bin/pandoc)
- WeasyPrint 66.0 (/opt/homebrew/bin/weasyprint)

Result summary

- Candidates examined: 66 tracked .md
- Already up-to-date (.html current → SKIPPED): 20
- Generated this run: 46 .html + 46 .pdf siblings
- Generation failures: 0 (every pandoc + weasyprint step OK; every output file-verified as “HTML document text” / “PDF document”)

Raw evidence: run.log (tool versions, per-file status table, per-file pandoc/weasyprint output, FAIL grep = ZERO, per-sibling file + byte sizes).

Siblings produced (by directory)

Directory	HTML+PDF pairs
docs/research/main_specs/ (README, CONTINUATION)	2
docs/research/main_specs/00-master/	7
docs/research/main_specs/00-master/diagrams/	1
docs/research/main_specs/1.0.0-mvp/ (VALIDATION_EVIDENCE)	1
docs/research/main_specs/1.0.0-mvp/api/ (endpoints)	1
docs/research/main_specs/1.0.0-mvp/client_android/	3

Directory	HTML+PDF pairs
docs/research/main_specs/1.0.0-mvp/database/	1
docs/research/main_specs/1.0.0-mvp/deployment/	2
docs/research/main_specs/1.0.0-mvp/security/	3
docs/research/main_specs/1.0.0-mvp/server/	3
docs/research/main_specs/1.0.0-mvp/tests/	1
docs/research/main_specs/1.X-linux/	1
docs/research/main_specs/1.X-other-os/	1
docs/research/main_specs/1.X-windows/	1
docs/research/main_specs/research/ (ota_landscape_report)	1
docs/research/main_specs/research/adr/	5
docs/research/main_specs/research/stacks/	12
Total	46

Skipped — .html already current (not regenerated, per task)

20 files: 00-master/threat_model.md; 1.0.0-mvp/api/{implemented_endpoints, operational_endpoints, spec_impl_alignment}.md; 1.0.0-mvp/dashboard/ dashboard_design.md; 1.0.0-mvp/security/validation_chain_order.md; all six 1.0.1-staged-rollout/*.md; 1.0.2-rollback/README.md; both 1.0.3-delta-updates/*.md; research/additions_analysis/{01,02,03}_analysis.md; research/additions_synthesis.md; research/repo_audit.md.

Skipped — out of scope (per task)

- docs/research/main_specs/additions/ source corpus (manages own exports)
- any _exports/ directories

Tool-absence skips

None — both pandoc and weasyprint were present and functional.
